About Colourchemist

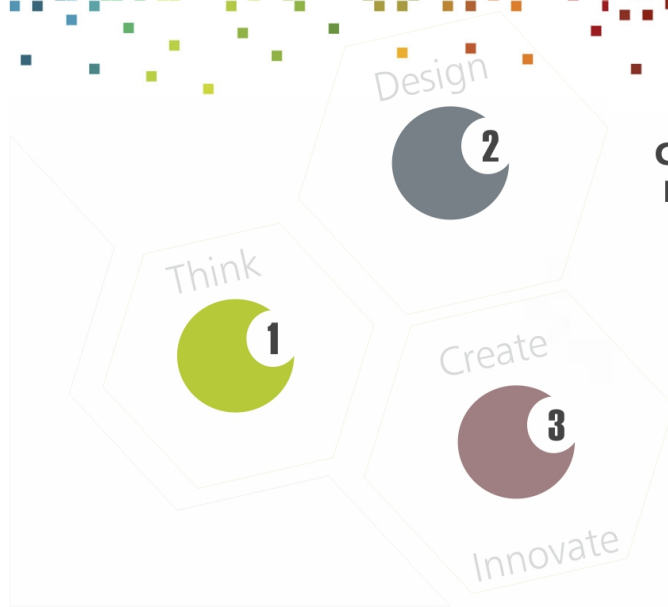

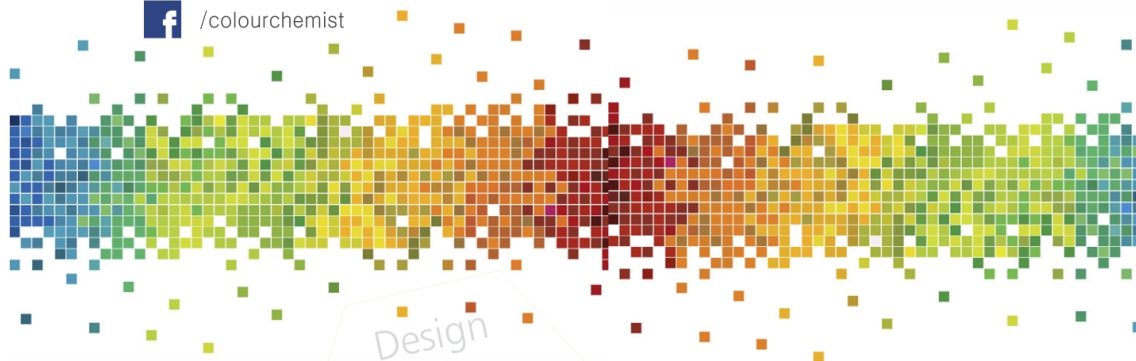

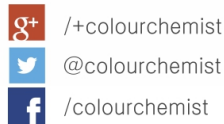

Colourchemist offers designing services to individuals, organisations, business start-ups, Corporates & Professionals from various fields. The team of creative people at the helm of affairs in the company are experienced professionals in the field and are still in a constant pursuit of knowledge & look up to the advancements in the field so as to equip ourselves with the latest in tech and incorporate it into business. We offer a range of services with full understanding of the importance of design in our day to day lives & especially on the field of marketing. We serve our best & fullest when it comes to business and deliver to our clients' needs.

Allied to Design services are many verticals which we have considerable expertise. On this grounds we serve consultancy services to our design clients in the fields of Printing, Web Designing, Web Hosting / Web Development, Android Application Development, Mobile Web, Animation & Industrial/Product Photography.

Startup Package

From logos to Low-high's of devising and implementing the marketing strategy. From business plans to building the business right along. We help our clients achieve creative stability in every level.

Creating Identity for a start up company is a very crucial aspect which should not be overlooked. We are keen in this point and help our clients with choosing the right identity for them by means of establishing their idea in to a single representable form which is popularly referred to as logo. We offer a special startup Design / Print Package which would be great assistance to our clients who establish their fresh business. Further enquiries related to the same are welcomed. Feel free to call us.
